

**PRODUITS METALLURGIQUES &
PALPLANCHES EN P.V.C. RECYCLE**

A simple line drawing of a rectangular table with four legs. The table is shown from a slightly elevated perspective, with the front edge closer to the viewer. The legs are straight and rectangular, supporting the flat top surface. The drawing is minimalist, using only black outlines on a white background.

*Tensile stress limited. Assumes the simply supported bending case (e.g., an anchored wall) where legs are fully and continuously soil supported and the flat face is in bending tension. Due to the asymmetry of the shape, cantilever designs and those with more complex configurations will most likely require a reduction in the sheet pile's design capacity.
